Basketball Game

By Josh

On Sunday we had a big basketball game. We had lost to them by 1 point last game. Two of my friends were on that team. When we started the first and second grade played first period. At the end of the period we were winning by 6 points. At the next period the third and fourth graders played. We tried to keep our score up, but when we scored they would score right after we did. After this period we were up by 10 points. It was half time and we were shooting basketballs in the net. I scored a lot of them. Then we had to get ready for the next period. The first and second graders were playing again. They got some baskets and they were still behind by 10 points again. Now it was our turn again. I scored 1 basket that period and there were 5 seconds to go and they were down by 8 points. Our team shouted "five four three two one we have won". I was so excited we were in third place. At 6:00 we had to come back and eat and get our trophies. After, we went to the park and played man on gravel.
